Travel with Purpose
Hilton Columbus Downtown
Our Commitment to Sustainability
Our skylight has little ceramic discs to improve solar control performance which allows us to regulate the temperature in the atrium more efficiently. Hilton Columbus Downtown is LEED Gold Certified.

32% annual energy reduction by using innovation lighting design, efficient mechanical systems & considerate exterior wall construction.

We recycle glass, plastic, metal, bars of soap, paper, cardboard, batteries, light bulbs & fryer grease.
Our fixtures use 30% less water than standard options saving an estimated 1 million gallons per year!

Our pool is saline-based which is a greener, most cost-effective alternative to chlorine

There will be a green roof in the new tower which will be irrigated from a rain water collection system
A computerized **Building Automation System** monitors how the building equipment is operating in real time & adjusts based on occupancy.

Guest room **thermostats & lighting** automatically turn on & off based on vacancy.

87% of appliance power usage is from **Energy Star** rated devices.
